

SCIENCE

Our science department believes that to become informed citizens and leaders in the world everyone should have a basic understanding of science. The world is increasingly dependent on scientific knowledge and technology which makes an education in science essential. We hope that all of our students will gain a better understanding of current events, new technology, and healthy decision-making through our science curriculum.

Six semesters of science are required for graduation, but students who may study science in college are encouraged to take an additional science class in their senior year.

Course offerings

- Biology
- Biology XL
- AP Biology
- Chem in the Community
- Chemistry
- AP Chemistry
- Physics
- AP Physics 1
- AP Physics 2
- Anatomy and Physiology
- Environmental Science

“Most people say that it is the intellect which makes a great scientist. They are wrong: it is character.”

–Albert Einstein

Good to know...

- **All science classes are lab based and meet UC lab science requirements**
- **Freshmen take a full year of biology**
- **Juniors and Seniors can choose from anatomy and physiology, environmental science, and physics**
